EDUCATION

Tufts University **May 2027**

Bachelor of Science, Computer Science and Mathematics; Minor in Economics

- **GPA:** 3.5/4.0
- **Achievements:** Dean's List, 5 semesters

PROFESSIONAL EXPERIENCE

Wabtec Corporation

LEAD IT Intern - Enterprise AI & Customer Service Transformation **Jun 2026 - Jul 2026**

- Diagnosed failures in a reverted Salesforce Agentforce rollout handling 1,000 daily cases across 20 global teams; synthesized five stakeholder interviews to identify data, model, prioritization, and feedback issues, informing fixes that restored case routing.
- Built a configurable Python/Salesforce API evaluation framework with a ground-truth benchmark of ~150 cases across 15 representatives; created the team's first repeatable measure of AI classification accuracy, selected for a planned proof of concept.
- Independently authored a 10-page findings report, 23-page enterprise AI playbook, solution matrix, and two executive presentations; delivered recommendations across business, IT, Salesforce, and consulting teams and presented lessons to the CIO and 30+ attendees.
- Managed the winning intern technology challenge team and built a Python/ML pipeline identifying employees eligible for least-privilege application access; handed off the solution with GitLab CI/CD, Docker, scheduled runs, and automated SQL uploads for Power BI.

Engineering Intern - Software Engineering **May 2025 - Aug 2025**

- Built Python automation synchronizing issue status, ownership, and workflow data between ClearQuest and GitLab to reduce duplicate-entry risk; presented to senior leaders across application teams and transitioned it to a full-time engineer.

Tufts University

Teaching Assistant, CS105: Programming Languages **Sep 2025 - Jan 2026**

- Led office hours three times weekly and graded assignments for a course of 150+ students, explaining functional programming, type systems, and interpreter design.

Access & Outreach Ambassador; Customer Service Representative **Sep 2025 - Present**

- Represent Tufts through tours and admissions panels, engaging 30+ prospective students and family members weekly; coordinated outreach and show logistics across ten a cappella and dance groups for the Voices of Tufts Supershow.

TECHNICAL PROJECTS

Readability Classification | Python, scikit-learn

- Built an NLP classifier using TF-IDF and 28 readability/stylometric features; identified leakage in ordinary cross-validation and switched to author/title-grouped folds for more defensible evaluation.

uScheme Interpreter Optimization | Standard ML

- Implemented recursive free-variable analysis and retained only referenced bindings in closure environments, reducing runtime by 74% (5.14s to 1.35s) on the assignment benchmark.

LEADERSHIP

Tufts Daily Flame **Sep 2025 - Present**

Co-President, May 2026–Present; Founding Lead, Sep 2025–May 2026

- Directly manage 6–7 leaders in a 100+ student fellowship; founded Men of Iron, designing its weekly format and team roles and growing participation from 3–4 active men to 10–15 weekly attendees.

Tufts Black Men's Group **Sep 2025 - May 2026**

Co-President

- Rebuilt a 20–25-participant organization previously run by one person into a seven-member leadership team with a governance framework and task dashboard; the operating model was formally adopted by the Africana Center.

SKILLS

Technical: Python, SQL, C/C++, Standard ML, pandas, scikit-learn, Salesforce APIs, Docker, GitLab CI/CD, Excel, Power BI

LANGUAGES & INTERESTS

Spanish (conversational) | Arsenal FC, music & DJing, philosophy, coffee, financial markets
